Contents

Introduction ......................................................................................................................................... v

1. Evolution of the Caribbean plate and origin of the Gulf of Mexico in light of plate motions
   accommodated by strike-slip faulting. ................................................................................................. 1
   E.G. Lidiak and T.H. Anderson

2. Detrital zircon provenance of the eastern Gulf of Mexico subsurface: Constraints on
   Late Jurassic paleogeography and sediment dispersal of North America ....................................... 89
   A.L. Weislogel, B. Hunt, A. Lisi, T. Lovell, and D.M. Robinson

3. Jurassic (170–150 Ma) basins: The tracks of a continental-scale fault, the Mexico-Alaska
   megashear, from the Gulf of Mexico to Alaska .................................................................................... 107
   T.H. Anderson

4. Construction of the Jurassic magmatic arc, southeast California and southwest Arizona .......... 189
   R.M. Tosdal and J.L. Wooden

5. Temporal and tectonic relations of early Mesozoic arc magmatism,
   southern Sierra Nevada, California ................................................................................................... 223
   J. Saleeby and G. Dunne

6. Detrital-zircon record of the early Mesozoic southwestern Sierra Nevada arc preserved in
   Lower Cretaceous intra-arc and forearc deposits of central California, USA ................................. 269
   M.W. Martin and D. Clemens-Knott

7. Cuesta Ridge ophiolite, San Luis Obispo, California: Implications for the origin of
   the Coast Range ophiolite. .................................................................................................................. 285
   C.A. Snow and J.W. Shervais

8. Jurassic evolution of the Western Sierra Nevada metamorphic province ................................. 299
   R.A. Schweickert

9. Mid-Jurassic to early Miocene clastic deposition along the northern California margin:
   Provenance and plate-tectonic speculations ..................................................................................... 359
   W.G. Ernst

10. Composite Sunrise Butte pluton: Insights into Jurassic–Cretaceous collisional tectonics and
    magmatism in the Blue Mountains Province, northeastern Oregon ........................................... 377
    K. Johnson, J.J. Schwartz, J. Žák, K. Verner, C.G. Barnes, C. Walton, J.L. Wooden, J.E. Wright,
    and R.W. Kistler
