Your latest research will find the right fit at GSA.

Do you have a group of topical papers that you dream of seeing in a GSA book?

Or a pithy yet mind-blowing manuscript looking for a journal?

GSA BOOKS

Special Papers and Memoirs are two of the book series published by GSA. Volumes in these series are:

- peer-reviewed
- published quickly after acceptance
- online ahead of print
- distributed worldwide (print + online)
- included in the Clarivate Analytics Book Citation Index

Science Editors:
- Richard A. “Skip” Davis Jr.
  Harte Research Institute, Texas A&M University
- Christian Koeberl, University of Vienna

Submit your proposal: books@geosociety.org

TOP-RATED JOURNALS

GSA journals publish scientific papers on all aspects of earth science, with science editors at the forefront of their fields overseeing a rigorous peer-review process for all manuscripts. Pre-issue publication online gets your accepted paper into circulation quickly.

GSA Bulletin—Published since 1890 and still going strong.
- #15 ranked “geosciences, multidisciplinary” journal by ISI

Geology—Measure your success with a paper accepted into this highly regarded journal.
- #1 ranked “geology” journal by ISI

Geosphere—Branch out unfettered with free color and a chance to bring animations and interactivity to your papers.

Lithosphere—Focuses on processes that affect the crust, upper mantle, landscapes, and sedimentary systems at all spatial and temporal scales.

Environmental & Engineering Geoscience—Explores the interaction of people with hydrologic and geologic systems.

www.gsapubs.org

NEW IN 2018

Geosphere and Lithosphere will be 100% open access beginning in January 2018.

ALSO: GSA members will continue to have free online access to Geology in 2018.

FIELD GUIDE 49  From the Puget Lowland to East of the Cascade Range: Geologic Excursions in the Pacific Northwest

Edited by Ralph A. Haugerud and Harvey M. Kelsey

Prepared in conjunction with the 129th annual meeting of the Geological Society of America, this compelling volume contains guides that geographically focus on the Seattle, Washington, area within the Puget lowland, and also includes descriptions of trips in the Cascade Range and the region east of the Cascades. Highlights of the guides include a journey through the region that was affected by an earthquake on the Seattle fault 1100 years ago, a trip to the coast to look at tsunami deposits, trips that show evidence of past glaciations that inundated the Puget lowland, and trips that highlight catastrophic flooding and blankets of wind-blown silt, both of which covered the area east of the Cascades due to continental glaciations. Multiple trips help unravel the complex but fascinating geological history of the Cascade Range.

Related Books
This volume explores linkages between tectonic processes through field, numerical modeling, and laboratory studies, concentrating on feedback mechanisms within ancient and evolving orogens by which individual or linked tectonic processes may influence or predetermine the operation of other processes in space and time. Case studies cover a wide range of ancient to modern orogens: the Svecofennian of southern Finland, the Gyeonggi Massif of Korea, the Caledonides of northern Scotland, the Variscan of the East European craton, the Appalachians of the eastern United States, the European Alps and Dinarides, north Cascades of the northwestern United States, and the Himalaya. Emphasis is placed on integration between data sets developed from analytical approaches, including field mapping, seismic reflection profiling, strain analyses, petrology, isotopic dating, and numerical modeling studies of thermal evolution.

MWR213, 372 p. + plate, ISBN 9780813712130
| $95.00 | member price $66.00

In this Special Paper, Hildebrand and Whalen present a big-picture, paradigm-busting synthesis that examines the tectonic setting, temporal relations, and geochemistry of many plutons within Cretaceous batholithic terranes of the North American Cordillera. In addition to their compelling tectonic synthesis, they argue that most of the batholiths are not products of arc magmatism as commonly believed, but instead were formed by slab failure during and after collision. They show that slab window and Precambrian TTG suites share many geochemical similarities with Cretaceous slab failure rocks. Geochemical and isotopic data indicate that the slab failure magmas were derived dominantly from the mantle and thus have been one of the largest contributors to growth of continental crust. The authors also note that slab failure plutons emplaced into the epizonal core are commonly associated with Cu-Au porphyries, as well as Li-Cs-Ta pegmatites.

The Restless Indian Plate and Its Epic Voyage from Gondwana to Asia: Its Tectonic, Paleoclimatic, and Paleobiogeographic Evolution

By Sankar Chatterjee, Christopher R. Scotese, and Sunil Bajpai, 2017

The fossil history of animal life in India is central to our understanding of the tectonic evolution of Gondwana, dispersal of India, its northward journey, and its collision with Asia. This book provides the only detailed overview of the paleobiogeographic, tectonic, and paleoclimatic evolution of the Indian plate from Gondwana to Asia. This thorough, up-to-date volume is a must-have reference for researchers and students in Indian geology, paleontology, plate tectonics, and collision of continents.

The Hell Creek Formation and the SPE361P:

This volume presents the results of interdisciplinary research, synergetically combining geologic, geologic, and archaeological approaches focused on examining the ways that Late Precontact peoples depended upon the bison (bison) and plant resources of a changing landscape subject to erosion and sediment transport as dominant surficial processes. Connections between erosion and deposition, plant community distribution, large mammal niches, and native peoples’ place in the Marias River canyon ecosystem, as well as the role of tributary-junction alluvial fans as repositories of archaeological materials and vertebrate faunal remains are emphasized.

Unconventional: The Development of Natural Gas from the Marcellus Shale

By Daniel J. Soeder, 2017

New technology has opened vast reserves of “unconventional” natural gas and oil from shales like the Marcellus in the Appalachian Basin, making the United States essentially energy independent for the first time in decades. Shale gas had its origins in the oil embargos and energy crises of the 1970s, which led to government research to increase domestic energy supplies. The first large-scale shale gas production was successful on the Barnett Shale in Texas in the late 1990s, followed a few years later by the Marcellus Shale in Pennsylvania. Shale gas has changed thinking about fossil energy supplies worldwide, but the development of these resources has been controversial. Activists have made claims that hydraulic fracturing may contribute to climate change, threaten groundwater resources, and pose risks to terrestrial and aquatic ecosystems, and human health. This volume explores the geology, history, technology, and potential environmental impacts of Marcellus Shale gas resources.

The Crust-Mantle and Lithosphere-Asthenosphere Boundaries: Insights from Xenoliths, Orogenic Deep Sections, and Geophysical Studies

Edited by Gianluca Bianchini, Jean-Louis Bodinier, Roberto Braga, and Marjorie Wilson, 2017

This 10-chapter volume encompasses contributions from a wide spectrum of Earth science disciplines, including geophysics, geodynamics, geochemistry, and petrology, to provide an overview of the nature and evolution of the crust-mantle and lithosphere-asthenosphere boundaries in different tectonic settings, combining studies that exploit different types of data and interpretative approaches. The integration of geochemical, geophysical, and geodynamic data sets and their interpretation provides a state-of-the-art summary of current understanding, and will serve as a blueprint for future research activities.

Salt Diapirs of the Great Kavir, MWR177P:
Cimmeride Orogenic System and Tectonic Evolution, Collision, and Taurian and Pontic mountains; the region
Southwest Asia is one of the most remark-
able regions on Earth in terms of active faulting and folding, large-magnitude earthquakes, volcanic landscapes, petroliferous foreland basins, historical civilizations, and geologic outcrops that display the protracted and complex 540 m.y. stratigraphic record of Earth's Phanerozoic Era. Emerged from the birth and demise of the Paleo-Tethys and Neo-Tethys oceans, southwest Asia is currently the locus of ongoing tectonic collision between the Eurasia-Arabia continental plates. The region is characterized by the high plateaus of Iran and Anatolia fringed by the lofty ranges of Zagros, Alborz, Caucasus, Taurus, and Pontic mountains; the region also includes the strategic marine domains of the Persian Gulf, Gulf of Oman, Caspian, and Mediterranean. This 19-chapter volume, published in honor of Manuel Berberian, a preeminent geologist from the region, brings together a wealth of new data, analyses, and frontier research on the geologic evolution, collisional tectonics, active deformation, and historical and modern seismicity of key areas in southwest Asia.
SPE525, 19 chapters, ISBN 9780813725253 |

The Stratigraphic Record of Gubbio: Integrated Stratigraphy of the Late Cretaceous–Paleogene Umbria-Marche Pelagic Basin
Edited by Marco Menichetti, Rodolfo Coccioni, and Alessandro Montanari, 2016
Since the beginning of the last century, the lower Jurassic to mid-Miocene pelagic succession exposed along the valleys of the Umbria and Marche Apennines of Italy represented a fertile playground for generations of earth scientists. This volume provides a reappraisal of the geological and integrated stratigraphic research, which was carried out by scores of earth scientists in the gorges around the medieval city of Gubbio over the past fifty years. Following review chapters about pioneering sedimentologic, biostratigraphic, and magnetostratigraphic studies of the Gubbio sections, a series of papers presents new, original data addressing different stratigraphical, paleoenvironmental, and structural geological aspects of particular Cretaceous to Paleogene intervals, including the still much-debated K-Pg Boundary Event in the world-famous site of the Bottaccione Gorge, where the Alvarez theory of global mass extinction caused by a catastrophic extraterrestrial impact was born in 1980.
SPE524, 175 p., ISBN 9780813725246 |

The Web of Geological Sciences: Advances, Impacts, and Interactions II
Edited by Marion E. Bickford
This book is a follow-up to Special Paper 500: The Web of Geological Sciences: Advances, Impacts, and Interactions, which was prepared to celebrate the 125th anniversary of the founding of GSA, and whose theme was “What have we learned in the last fifty years?” Three important disciplines that were not covered in the first book are engagingly presented here: “Earth’s dynamic surface: The past 50 years in geomorphology” by Ellen Wohl et al.; “The metamorphosis of metamorphic petrology” by Frank Spear et al.; and “The Archean–Hadean Earth: Modern paradigms and ancient processes” by Paul Mueller and Allen Nutman. Readers will find these chapters comprehensive and readable. They will appeal to professional scientists and especially to teachers.

Pocket-Sized Sand Grain Sizing Folder
This pocket-sized folder consists of a sphericity/roundness measuring chart; printed examples of well-sorted and poorly sorted grain samples in the fine, medium, and coarse ranges; four actual grain samples illustrating angular, sub-angular, subrounded, and rounded shapes; and six grain size samples (silt, very fine sand, fine sand, medium sand, coarse sand, and very coarse sand). Measurement limits for granules, pebbles, cobbles, and boulders are indicated.

GSA Photo Scale/Time Scale
This versatile field tool combines GSA’s popular photo scale and time scale. On one side is our Author’s Photo Scale, calibrated boldly in centimeters (10) and inches (4). Includes a GSA seal for fine focus and an evaluation scale for granular material from 1 to 5 millimeters diameter. The reverse side includes the complete Geologic Time Scale. Sturdy 20-mil × 2.5” × 6.5” tan vinyl printed in blue.

Wallet-Size Geologic Time Scale
Great for handouts or as a portable reference.

By Henry Aurand, 2000

DohbicKey 6x Key Tool by Nite Ize®
Made of durable stainless steel and designed with a carabiner clip for easy attachment, one end is engineered to work as a scraper, tape cutter, and scorer; the other end serves as a flat-head screwdriver and pry tool. The outer edge is scored as a ruler in both inches and centimeters, the opposite edge features a bottle opener, and the interior is ridged to provide 3 wrench sizes. Best of all, this tool is airport friendly, so you can take it with you and keep it close at hand.

Geologic Field Trips of the Canadian Rockies: 2017 Meeting of the GSA Rocky Mountain Section

Edited by Jean C.C. Hsieh, 2017

This field guide volume includes five trips that explore the structural geology, sedimentology, and paleontology of the region, as well as exploring the relationship of the geology to the regional petroleum and mining industries. The guides describe the geology of a classic E-W transect through the Canadian Rockies, the stratigraphy of the UNESCO World Heritage Site of Dinosaur Provincial Park, the unique fossils of the Burgess Shale, the Mesoproterozoic Belt Supergroup of the National Parks on both sides of the border, and the sedimentology of an analog for the prolific petroleum-producing Montney Formation. Grab a copy and head out to the Canadian Rockies!

From the Blue Ridge to the Beach: Geological Field Excursions across Virginia

Edited by Christopher M. Bailey and Shelley Jaye, 2017

This volume includes seven field guides that explore the diverse geology of Virginia from its Appalachian highlands to the Atlantic shore. The guides cover an array of topics ranging from cave and karst development in the Valley and Ridge to the exceptional fossil localities at the Carmel Church Quarry and the cliffs near Stratford Hall to Precambrian rocks in the Blue Ridge Mountains. Three guides focus on the Paleozoic to Proterozoic tectonic history of the Blue Ridge and Piedmont provinces, two guides discuss the stratigraphy and fossil assemblages preserved in Cenozoic deposits on the Atlantic Coastal Plain, one guide examines Paleozoic stratigraphy and cave formation in western Virginia, and the final guide explores the relationship between the geology of the Fall Zone and the Civil War during the Petersburg Campaign in 1864–1865.

Field Excursions in Southern California: Field Guides to the 2016 GSA Cordilleran Section Meeting

Edited by Brian Kraatz, Jade Star Lackey, and Joan E. Fryxell, 2017

This volume contains six chapters that highlight geological features and processes of southern California and southwestern Nevada, including newly mapped areas in the Mojave Desert, Coyote Mountains, and recently designated Tule Springs Fossil Beds National Monument. Topics include tectonics, volcanics, stratigraphy, mineralogy, and paleontology, spanning the Mesozoic and Cenozoic history of the region. This field guide places special emphasis on the modern perspective of the interplay of tectonics, magmatism, and metamorphism in the Cordilleran arc system.

Unfolding the Geology of the West

Edited by Stephen M. Keller and Matthew L. Morgan, 2016

Prepared in conjunction with the 2016 GSA Annual Meeting in Denver, Colorado, this volume contains sixteen guides to field trips in this rich geologic region. The four “Great Surveys” of the late 1800s ventured west to explore and document the region’s unknown natural resources and collect valuable geologic information. Many of the field guides in this volume, aptly titled Unfolding the Geology of the West, will cover the same hallowed ground as the early geologic expeditions. Organized into four sections, this volume spans some of the major subdisciplines of geology: (1) stratigraphy, sedimentology, and paleontology; (2) structure and metamorphism; (3) Quaternary landscape evolution; and (4) engineering and environmental geology.

Geology of the Baraboo, Wisconsin, Area: Geological Society of America Field Guide

Edited by Richard A. Davis Jr., Robert H. Dott Jr., and Ian W.D. Dalziel, 2016

With its wide variety of geological features and phenomena packed into a small area, the Baraboo of south-central Wisconsin is among the most visited parts of the Midwest by geology students. This guidebook, the first comprehensive look at the area in decades, covers the spectrum of geological features present in the area, and it is useful as a teaching tool. An exceptional outdoor classroom, the Baraboo area contains a spectrum of geology, including excellent examples of geomorphology, glacial geology, structural geology, petrology, stratigraphy, and sedimentology. Ages of the strata range from 1.7-billion-year-old Precambrian to the Quaternary. The area has been studied for about a century, but it still holds surprises for professionals and students alike.

Edited and compiled by Mark B. Carpenter and Christopher M. Keane

Graphics by Kat Cantner

Featuring the contributions of over 240 experts worldwide in their respective fields, this new, expanded edition has more than 470 full-color pages. Three years of work went into the Handbook to broaden its scope across the disciplines. With more than 170 complete new data sheets, and full revisions of prior data sheets, over 85% of the content is either new or revised. The Geoscience Handbook is the quick reference tool for key metrics and concepts, a guide to cornerstone papers and recent developments, as well as short tutorials on relevant topics. Published by the American Geosciences Institute.

In and Out of the Classroom

Geological Monitoring
Edited by Rob Young and Lisa Norby, 2009

Geological Monitoring is a practical, nontechnical guide for land managers, educators, and the public that synthesizes representative methods for monitoring short-term and long-term change in geologic features and landscapes. A prestigious group of subject-matter experts has carefully selected methods for monitoring dunes, caves and karst, rivers, geothermal features, glaciers, nearshore marine features, beaches and marshes, paleontological resources, permafrost, seismic activity, slope movements, and volcanic features and processes. Each chapter has an overview of the resource; summarizes features that could be monitored; describes methods for monitoring each feature ranging from low-cost, low-technology methods (that could be used for school groups) to higher-cost, detailed monitoring methods requiring a high level of expertise; and presents one or more targeted case studies.

Geological Field Trips in Central Western Europe
Fragile Earth International Conference, Munich, September 2011
Eds: Sara Carenza, Anke M. Friedrich, and Bernd Lammerer
2011 | FLD021 | $10.00

Field Guide to Samos and the Menderes Massif
Along-Strike Variations in the Mediterranean Tethyan Orogen
Eds: Klaus Gesnner, Uwe Ring, and Talip Gungör
2011 | FLD025 | $10.00

The Southern Cordillera and Beyond
Eds: Jose Jorge Aranda-Gomez, Gustavo Tolson, and Roberto S. Molina-Garza
2012 | FLD025 | $10.00

Neoproterozoic Glacial and Associated Facies in the Tanafjord–Varangerfjord Area, Finnmark, North Norway
A.H.N. Rice, Marc B. Edwards, and T.A. Hansen
2012 | FLD026 | $10.00

On and around the Cincinnati Arch and Niagara Escarpment
Geological Field Trips in Ohio and Kentucky for the GSA North-Central Section Meeting, Dayton, Ohio, 2012
Eds: Michael R. Sandy and Daniel Goldman
2012 | FLD027 | $10.00

Deformation, Fluid Flow, and Mass Transfer in the Forearc of Convergent Margins
Field Guides to the Northern Apennines in Emilia and in the Apuan Alps (Italy)
Eds: Paola Vannucchi and Donald Fisher
2012 | FLD028 | $10.00

From the Blue Ridge to the Coastal Plain
Field Excursions in the Southeastern United States
Eds: Martha Cary Eppes and Mervin J. Bartholomew
2012 | FLD029 | $10.00

Insights into the Michigan Basin
Salt Deposits, Impact Structure, Youngest Basin Bedrock, Glacial Geomorphology, Dune Complexes, and Coastal Bluff Stability
Ed: Robb Gillespie
2013 | FLD031 | $10.00

Classic Concepts and New Directions
Exploring 25 Years of GSA Discoveries in the Rocky Mountain Region
Eds: Lon D. Abbott and Gregory S. Hancock
2013 | FLD033 | $10.00

Formation of the Sierra Nevada Batholith
Migmatic and Tectonic Processes and Their Temporal Evolution
2014 | FLD034 | $20.00

Elevating Geoscience in the Southeastern United States
New Ideas about Old Terranes—Field Guides for the SGS Southeastern Section Meeting, Blacksburg, Virginia, 2014
Eds: Christopher M. Bailey and Lorrie V. Coiner
2014 | FLD035 | $20.00

Geologic Field Trips along the Boundary between the Central Lowlands and Great Plains
2014 Meeting of the GSA North-Central Section
Ed: Jesse T. Korus
2014 | FLD036 | $30.00 | member price $20.00

Exploring the Northern Rocky Mountains
Eds: Colin A. Shaw and Basil Tikoff
2014 | FLD037 | $20.00

Trials and Tribulations of Life on an Active Subduction Zone
Field Trips in and around Vancouver, Canada
Eds: Shahin Dashtgard and Brent Ward
2014 | FLD038 | $20.00

Diverse Excursions in the Southeast
Paleozoic to Present
Ed: Ann E. Holmes
2015 | FLD039 | $50.00 | member price $40.00

Tripping from the Fall Line
Field Excursions for the GSA Annual Meeting, Baltimore, 2015
2015 | FLD040 | $45.00 | member price $35.00

Exploring the Geology of the Inland Northwest
Eds: Reed S. Lewis and Keegan L. Schmidt
2016 | FLD041 | $60.00 | member price $42.00

Gold, Structures, and Landforms in Central South Carolina
Field Guides for the 2016 GSA Southeastern Section Meeting, Columbia, South Carolina
Ed: William R. Doar III
2016 | FLD042 | $20.00 | member price $14.00

Geology of the Baraboo, Wisconsin, Area
Eds: Richard A. Davis Jr., Robert H. Dott Jr., and Ian W.D. Dalziel
2016 | FLD043 | $40.00 | member price $28.00

Unfolding the Geology of the West
Eds: S. Keller and M. Morgan
2016 | FLD044 | $42.00 | member price $30.00

Field Excursions in Southern California
Field Guides to the 2016 GSA Cordilleran Section Meeting
Eds: Brian Kraatz, Jade Star Lackey, and Joan E. Fryxell
2017 | FLD045 | $60.00 | member price $42.00

Forts, Floods, and Periglacial Features
Exploring the Pittsburgh Low Plateau and Upper Youghiogheny Basin
Eds: Joseph T. Hannibal and Kyle C. Fredrick
2017 | FLD046 | $37.00 | member price $26.00

From the Blue Ridge to the Beach
Geological Field Excursions across Virginia
Eds: Christopher M. Bailey and Shelley Jaye
2017 | FLD047 | $52.00 | member price $36.00

Special Papers

Geology, Hydrogeology, and Environmental Remediation
Idaho National Engineering and Environmental Laboratory, Eastern Snake River Plain, Idaho
Eds: Paul Karl Link and L.L. Mink
2002 | SPE353 | $5.00

Petrologic and Structural History of Tobago, West Indies
A Fragment of the Accreted, Mesozoic Oceanic Arc of the Southern Caribbean
Arthur W. Snake, David W. Rowe, J. Douglas Yule, and Geoffrey Wade
2001 | SPE354 | $5.00

Is the Present the Key to the Past or the Past the Key to the Present?
James Hutton and Adam Smith versus Abraham
Gottlob Werner and Karl Marx in Interpreting History
A.M.C. Sengör
2004 | SPE355 | $20.00

Nearshore Marine Paleoclimatic Regions, Increasing Zoogeographic Provinciality, Molluscan Extinctions, and Paleoshorelines, California
Late Oligocene (27 Ma) to Late Pliocene (2.5 Ma)
Clarence A. Hall Jr.
2002 | SPE357 | $10.00

Geology and Geophysics of an Arc-Continent Collision, Taiwan
Eds: Timothy B. Byrne and Char-Shine Liu
2002 | SPE358 | $10.00

Natural Hazards in El Salvador
Eds: Julian J. Bonner, William I. Rose, Dina L. López, Michael J. Carr, and Jon J. Major
2004 | SPE375 | $10.00

Hydraulic Tests of Miocene Volcanic Rocks at Yucca Mountain and Paleute Mesa and Implications for Groundwater Flow in the Southwest Nevada Volcanic Field, Nevada and California
Arthur L. Geldon
2004 | SPE381 | $10.00

Cenozoic Climatic and Environmental Changes in Russia
Eds: A.A. Velichko and V.P. Nechaev
2005 | SPE382 | $10.00

Reconstruction of Pleistocene Ice-Dammed Lake Outburst Floods in the Altai Mountains, Siberia
Jürgen Herget
2005 | SPE386 | $10.00

Plate, Plumes, and Paradigms on CD-ROM
Eds: Gillian R. Foulger, James H. Natland, Dean C. Presnall, and Don L. Anderson
2005 | SPE388CD | $10.00

Stone Decay in the Architectural Environment
Ed: Alice V. Turkington
2005 | SPE390 | $10.00

Net Dextral Slip, Neogene San Gregorio–Hosgri Fault Zone, Coastal California
Geologic Evidence and Tectonic Implications
2005 | SPE391 | $10.00

Isotopic and Elemental Tracers of Cenozoic Climate Change
Eds: Germán Mora and Donna Surge
2005 | SPE395 | $10.00

Geoinformatics
Data to Knowledge
Ed: A. Krishna Sinha
2006 | SPE397 | $10.00

New Frontiers in Dead Sea Paleoenvironmental Research
Eds: Yehouda Enzel, Amota Aqson, and Mordechai Stein
2006 | SPE401 | $10.00

Neogene-Quaternary Continental Margin Volcanism
A Perspective from México
Eds: Claus Siebe, José Luis Macías, and Gerardo J. Aguirre-Díaz
2006 | SPE402 | $10.00

Temper Sands in Prehistoric Oceanian Pottery
Geotectonics, Sedimentology, Petrography, Provenance
William R. Dickinson
2006 | SPE406 | $10.00

Postcollisional Tectonics and Magmatism in the Mediterranean Region and Asia
Eds: Yıldırım Dilek and Spyros Pavlides
2006 | SPE409 | $10.00

Volcanic Hazards in Central America
Eds: William J. Rose, Gregg J.S. Bluth, Michael J. Carr, John W. Ewert, Lina C. Patino, and James W. Vallance
2006 | SPE412 | $10.00

In Situ-Produced Cosmogenic Nuclides and Quantification of Geological Processes
Eds: Lionel L. Siame, Didier L. Bourlès, and Erik T. Brown
2006 | SPE415 | $10.00

Paleoenvironmental Record and Applications of Calcaretes and Palustrine Carbonates
Eds: Ana Maria Alonso-Zarza and Lawrence H. Tanner
2006 | SPE416 | $10.00

Triassic Evolution of the Yangtze Platform in Guizhou Province, People's Republic of China
2006 | SPE417 | $10.00

Cenozoic Volcanism in the Mediterranean Area
Eds: Luigi Beccaluva, Gianluca Bianchini, and Marjorie Wilson
2007 | SPE418 | $10.00

Convergent Margin Terranes and Associated Regions A Tribute to W.G. Ernst
Eds: M. Cloos, W.D. Carlson, M.C. Gilbert, J.G. Liou, and S.S. Sorensen
2007 | SPE419 | $10.00

Advances in High-Pressure Mineralogy
Ed: Eiji Ohtani
2007 | SPE421 | $10.00

The Evolution of the Rheic Ocean From Avalonian-Cadomian Active Margin to Alleghanian-Vardisan Collision
Eds: Ulf Linnemann, R. Damian Nance, Petr Kraft, and Gernold Zulauf
2007 | SPE423 | $10.00

Large Ecosystem Perturbations
Causes and Consequences
Eds: Simonetta Monèchi, Rodolfo Coccioni, and Michael Rampino
2007 | SPE424 | $10.00

Continental Intraplate Earthquakes
Science, Hazard, and Policy Issues
Eds: Seth Stein and Stéphane Mazzotti
2007 | SPE425 | $10.00

Geologic and Tectonic Development of the Caribbean Plate Boundary in Northern Central America
Ed: Paul Mann
2007 | SPE428 | $10.00

The Pennsylvanian–Early Permian Bird Spring Carbonate Shelf, Southeastern California
Fossilinid Biostratigraphy, Paleogeographic Evolution, and Tectonic Implications
Calvin H. Stevens and Paul Stone
2007 | SPE429 | $10.00

Plates, Plumes, and Planetary Processes
Eds: Gillian R. Foulger and Donna M. Jurdy
2007 | SPE430 | $10.00

Formation and Applications of the Sedimentary Record in Arc Collision Zones
Eds: Amy E. Draut, Peter D. Clift, and David W. Scholl
2008 | SPE436 | $10.00

Late Cenozoic Drainage History of the Southwestern Great Basin and Lower Colorado River Region
Geologic and Biotic Perspectives
Eds: Marit M. Reheis, Robert Hershler, and David M. Miller
2008 | SPE439 | $10.00

The Terrane Puzzle
New Perspectives on Paleontology and Stratigraphy from the North American Cordillera
Eds: Robert B. Blodgett and George D. Stanley Jr.
2008 | SPE442 | $10.00

Response of Upper Gulf Coast Estuaries to Holocene Climate Change and Sea-Level Rise
Eds: John B. Anderson and Antonio B. Rodriguez
2008 | SPE443 | $10.00

Investigations into the Tectonics of the Tibetan Plateau
Eds: B. Clark Burchfiel and Erchie Wang
2008 | SPE444 | $10.00
Deformation and Exhumation at Convergent Margins
The Franciscan Subduction Complex
Uwe Ring
2008 | SPE445 | $10.00

The Geology of Early Humans in the Horn of Africa
Eds: Jay Quade and Jonathan G. Wynn
2008 | SPE446 | $10.00

The Permain Extinction and the Tethys
An Exercise in Global Geology
A.M. Celil Sengör and Saniye Atayman
2009 | SPE448 | $10.00

The Southern California Continental Borderland
Africa
Adventures Through Deep Time
Whittecar
Results from the Eyreville Core Holes
Y ellowstone Magma Chamber
Laboratory Practice and Geological Theory at the
Earthquakes
Hydrothermal Explosions
2009

Field Geology Education
Historical Perspectives and Modern Approaches
Eds: Steven J. Whitmeyer, David W. Mogk, and Eric J. Pyle
2009 | SPE461 | $10.00

Stratigraphy and Geology of Volcanic Areas
Eds: Gianluca Gropelli and Lothar Viereck-Goette
2010 | SPE464 | $10.00

Geology and Tectonic Evolution of the
Central-Southern Apennines, Italy
Livio Vezzani, Andrea Festa, and Francesca C. Ghisetti
2010 | SPE469 | $10.00

Ancient Earthquakes
Eds: Manuel Sintубin, Iain S. Stewart, Tina M. Niemi, and Erhan Altanе
2010 | SPE471 | $10.00

Sixth Hutton Symposium on the Origin of
Granites and Related Rocks
Eds: John D. Clemens, Colin Donaldson, Carol D. Frost, Alexander E.M. Kisters, Jean-François Moyen, Tracy Rushmer, and Gary Stevens
2010 | SPE472 | $20.00

Geology and Geoarchaeology of the Black Sea Region
Beyond the Flood Hypothesis
Eds: Ilya V. Buynevich, Valentina Yanko-Hombach, Allan S. Gilbert, and Ronald E. Martin
2011 | SPE473 | $10.00

Geological Criteria for Evaluating Seismicity Revisited
Fifty Years of Paleoseismic Investigations and the Natural Record of Past Earthquakes
Eds: Franck A. Audemard M., Alessandro Maria Michetti, and James P. McCalpin
2011 | SPE479 | $10.00

Geological Criteria for Evaluating Seismicity Revisited
Fifty Years of Paleoseismic Investigations and the Natural Record of Past Earthquakes
Eds: Franck A. Audemard M., Alessandro Maria Michetti, and James P. McCalpin
2011 | SPE479 | $10.00

Environmental Change in Early Humans in the Horn of Africa
Eds: R. L. Neuville, J. E. Simpson, and H. L. Marlow
2011 | SPE480 | $10.00

The 2 ka Eruption of Misti Volcano, Southern Peru
The Most Recent Plinian Eruption of Arequipa's Iconic Volcano
Christopher J. Harpel, Shanaka de Silva, and Guido Salas
2011 | SPE484 | $10.00

On the Strata of the Earth
Mikhail Vasilevich Lomonosov, Translators
Stephen M. Rowland and Slava Korolev
2012 | SPE485 | $10.00

Mineralogical and Geochemical Approaches to Provenance
Eds: E. Troy Rasbury, Sidney R. Hemming, and Nancy R. Riggs
2012 | SPE487 | $10.00

Impossible Journey
The Story of the Victoria Land Traverse 1959–1960, Antarctica
John G. Weihaupt, Alfred W. Stuart, Frans G. Van der Hoven, Claude Lorius, and William M. Smith
2012 | SPE488 | $10.00

Mima Mounds
The Case for Polygenesis and Bioturbation
Eds: Jennifer L. Horwath Burnham and Donald L. Johnson
2012 | SPE490 | $10.00

Geology and Geomorphology of Barbados
A Companion Text to Maps with Accompanying Cross Sections, Scale 1:10,000
Robert C. Speed, Eds: Christine Speed and Richard Sedlock
2013 | SPE491 | $15.00

Recent Advances in North American Paleoseismology and Neotectonics East of the Rockies
Eds: Randel Tom Cox, Martitia P. Tuttle, Oliver S. Boyd, and Jacques Locat
2013 | SPE493 | $15.00

New Perspectives on Rio Grande Rift Basins
From Tectonics to Groundwater
Eds: Mark R. Hudson and V.J.S. (Tien) Grauch
2013 | SPE494 | $15.00

Mesozoic Assembly of the North American Cordillera
Robert S. Hildebrand
2013 | SPE495 | $15.00
Decade of North American Geology

The many volumes of theDNAG collection, created to help celebrate GSA's 100th anniversary, are available as e-books and can be downloaded for $9.99 each from the GSA store at http://rock.geosociety.org/store. The collection that once filled a floor-to-ceiling bookcase can now be read on your tablet or computer.

The Geology of North America

An Overview
Eds: Albert W. Bally and Allison R. Palmer

Geology of the Precambrian Superior and Grenville Provinces and Precambrian Fossils in North America
Coord: S.B. Lucas and M.R. St-Onge

Precambrian Conterminous U.S.
Eds: John C. Reed Jr., Marion E. Bickford, R.S. Houston, Paul Karl Link, D.W. Rankin, Paul K. Sims, and W. Randall Van Schmus

Sedimentary Cover of the Craton in Canada
Eds: D.F. Stott and J.D. Aitken

Sedimentary Cover
North American Craton U.S.
Ed: L.L. Sloss

Geology of the Innuitian Orogen and Arctic Platform of Canada and Greenland
Ed: H.P. Trettin

Geology of the Appalachian–Caledonian Orogen in Canada and Greenland
Ed: Harold Williams

The Appalachian–Ouachita Orogen in the United States
Eds: Robert D. Hatcher Jr., William A. Thomas, and George W. Viele

The Geology of Alaska
Eds: George Flaherty and Henry C. Berg

Geology of the Cordilleran Orogen in Canada
Eds: H. Gabrielse and C.J. Yuhas

The Cordilleran Orogen
Conterminous U.S.

The Caribbean Region
Eds: Gabriel Dengo and J.E. Case

Geology of the Continental Margin of Eastern Canada
Eds: M.J. Keen and G.L. Williams

The Atlantic Continental Margin
U.S.
Eds: Robert E. Sheridan and John A. Grow

The Gulf of Mexico Basin
Ed: Armos Salvador
1992 | GNAICD | CD format | $10.00 | member price $7.00

Quaternary Geology of Canada and Greenland
Ed: R.J. Fulton

Quaternary Nonglacial Geology
Conterminous U.S.
Ed: Roger B. Morrison

North America and Adjacent Oceans During the Last Deglaciation
Ed: W.E. Ruddiman and H.E. Wright Jr.

The Arctic Ocean Region
Eds: A. Grantz, L. Johnson, and J.E. Sweeney

The Western North Atlantic Region
Eds: Peter R. Vogt and Brian E. Tucholke

The Eastern Pacific Ocean and Hawaii
Eds: E.L. Winterton, Donald M. Hussong, and Robert W. Decker

Surface Water Hydrology
Eds: M.G. Wolman and H.C. Riggs

Hydrogeology

Geology of Canadian Mineral Deposit Types
Eds: O.R. Eckstrand, W.D. Sinclair, and R.I. Thorpe

Economic Geology, U.S.

Economic Geology, Mexico
Ed: Guillermo P. Salas

Geologists and Ideas
A History of North American Geology
Eds: Ellen T. Drake and William M. Jordan
1985 | DNAGCSV1 | Vol. V1 | 525 p. | $9.99

Geomorphic Systems of North America
Ed: William L. Graf

The Heritage of Engineering Geology
The First Hundred Years
Ed: George A. Kiersch

Archaeological Geology of North America
Ed: Norman P. Lasca and Jack Donahue

Centennial Special Volumes

The Geology of the Gulf of Mexico Basin...
Tour de Force, 2018

This 12-month, 9.5" × 12.5" calendar showcases exceptional submissions to the 2018 GSA calendar photo search. Featuring landscapes and scenic images including an upside-down iceberg (Antarctic Peninsula), Drumheller hoodoos (Canada), Mammoth Hot Springs (Wyoming), Olkhon Island (Siberia), and even a photomicrograph of asbestiform anthophyllite (Idaho), this stunning calendar will spruce up your office or home.

$9.95

SPECIAL FEATURES
- Dates of many noteworthy eruptions and earthquakes
- Birthdates of famous geoscientists
- Calendar of GSA events, meetings, and deadlines

Note Cards
GSA publications have sported stunning cover images over the years, and we have chosen ten of them for these note cards. Blank inside for your personal message.

(box of 10 cards 4.25" × 5.5")
Product Code: CRD004

ONLY $9.95

SPECIAL PAPER 530: Quaternary Glaciation of the Great Lakes Region: Process, Landforms, Sediments, and Chronology
SPECIAL PAPER 531: Paleozoic Stratigraphy and Resources of the Michigan Basin

Coming Soon!
