

TRANSFER of COPYRIGHT to GSA for JOURNAL ARTICLES

GEOLOGICAL SOCIETY OF AMERICA

P.O. Box 9140, Boulder, CO 80301-9140 USA

Return completed form to: Editorial Asst., GSA Editorial Dept., PO 9140, Boulder, CO 80301-9140, USA

Fax: 303-357-1070

MS Number: _____: GSA Bulletin Geology GSA Today

Title of your paper: _____

Author(s): _____

At least one author (the senior author) must sign this form, although all authors are encouraged to do so. Please type or print the name beside each signature. If the article was commissioned by an individual or organization other than the author, or was written as part of the duties of an employee, then this permission must be signed by an authorized representative of the commissioning organization or employer. Please read the explanations on the back side of this sheet.

COPYRIGHT AGREEMENT

I/we own the copyright, and have the consent and permission of each author to transfer copyright, of the article referenced above. I hereby assign and transfer to The Geological Society of America, Inc. full copyright and all rights under it, including, but not limited to, all rights for publication in paper, electronic, and facsimile formats, and for electronic capture, reproduction, and licensing in all formats, in whole or in part, now and in perpetuity, in the original and all derivative works. I affirm that this article has not been published previously elsewhere, nor is it under active consideration for publication at this time by any other publisher. I understand that I may not publish this paper by any means, including on any World Wide Web site, without prior written permission from the Geological Society of America.

WE CANNOT PUBLISH YOUR PAPER WITHOUT THIS FORM – PLEASE RETURN IT PROMPTLY

GSA cannot publish any works without a completed copyright-transfer agreement. Authors of manuscripts subject to Crown copyright, *i.e.*, those that are prepared solely by official employees of the governments of the United Kingdom, Canada, Australia, New Zealand, or other members of the Commonwealth, should contact GSA for an alternate copyright transfer form.

INFORMATION CONCERNING YOUR COPYRIGHT AGREEMENT

Introduction

Copyright Law and modern technology dictate that the Geological Society of America (GSA) obtain full copyright transfers on all articles we publish in our journals and books. This does not alter the long-standing relationship of trust between GSA and its authors, nor does it change the traditional philosophy behind our practice of copyrighting our journals and books.

GSA's copyright philosophy recognizes (1) that authors should be able to: present their works orally, and freely use "fair-use" items (figures, tables, and brief extracts) of their material in their future works; (2) that GSA needs to disseminate scholarly works as broadly as possible; (3) that individual scientists should be free to utilize GSA's material for limited educational uses such as in the classroom; and (4) that we need to insure the integrity of our publications in the face of technology that make unauthorized distribution of data inviting.

Important Limitation—Pre-publication, by the author or others, by any means whatsoever of the material covered by this agreement is prohibited prior to publication by the GSA. This prohibition includes, but is not limited to, publication electronically via the Internet or on any World Wide Web site, or in print. Re-publication of the material by the author or others after publication by the GSA is subject to the terms of this agreement and of the statements detailed in the masthead of each publication. When in doubt, request permission from GSA Copyright Permissions.

Works prepared by independent authors—Under this agreement, authors retain all proprietary rights other than copyright, such as patent rights. GSA hereby grants to the authors of this work the right to present the material orally; the right to reproduce "fair use" items such as figures, tables, and extracts, properly cited, in their future works without further permission from GSA, and to use the material for certain purposes that advance science and education. To ensure the broadest dissemination of your work in GSA publications, we require all non-U.S. Government employees to transfer copyright to us. This permits us to publish our journals and books in all formats (including paper, microform, and electronic media), to grant permission to abstracting and indexing services that wish to include titles, authors, abstracts, etc., from our publications, and to grant permission for photocopying beyond the narrow limits defined in the law, such as for classroom use and other scientific purposes, for licensed inter-library services; for commercial purposes where deemed appropriate, including use in future works by other authors.

Works prepared only by U.S. Government Employees—Work prepared *only* by U.S. Government employees in their official capacities is not subject to copyright in the U.S. Works prepared by these authors are *generally* considered to be in the public domain, where they may be freely copied, republished, and redistributed. In order for the work to be placed in the public domain, *all authors* of the paper must be official U.S. Government employees.

Works prepared by both official U.S. Government employees and privately employed persons—In instances where authorship consists of *both* U.S. Government employees and privately employed individuals, we require at least one privately employed author to transfer copyright to GSA. This provides the best protection and makes possible the broadest dissemination of the science.

Works prepared by privately employed persons in the course of their job—Privately employed authors who have written articles in their official capacities as employees (other than U.S. Government employees) should transfer copyright to GSA on our form. The author's employer retains the same rights as individual authors, as noted above. This category will usually include employees of state and local governments and agencies who prepare works in their official capacities.

Works supported by U.S. Government grants or contracts—Authors who publish works specifically supported by a U.S. Government grant or contract are requested to transfer copyright to GSA. This permits broad dissemination of the work while recognizing the U.S. Government's prior license to use the work for noncommercial purposes.

Copyright exchange between GSA & the Treatise on Invertebrate Paleontology—Authors should be aware that a special relationship exists between GSA and the *Treatise on Invertebrate Paleontology* at the University of Kansas that permits reproduction of fair-use items (figures, tables, and extracts), properly cited, by one organization in the publications of the other without requesting permission. This applies only if the material was "original" within the respective publication, not "by permission" from another source—check the citation to be sure. If it was by permission, or for more than fair-use portions, permission should be requested.

Please sign the applicable part of the form on the reverse side and return it promptly to GSA. We cannot guarantee publication nor begin the production process until this signed form has been received. Help us expedite the publication of your paper with your immediate response. If you have any questions, please call Steven Williams in the Editorial Department at 303-357-1059, or E-mail swilliams@geosociety.org.
