<i>Series Editor's Foreword</i>	v
Syed E. Hasan	
<i>Editors' Introduction</i>	
1. <i>Military geosciences in the twenty-first century—A historical perspective and overview</i>	1
Russell S. Harmon and Eric V. McDonald	
<i>Prologue</i>	
2. <i>Environmental security revived: A global security threat</i>	11
W. Chris King	
PART I. HISTORICAL PERSPECTIVES	
3. <i>Military geosciences before the twenty-first century</i>	19
Edward P.F. Rose	
4. <i>From protection to projection: An overview of location considerations for U.S. military bases</i> ..	27
Harold Balbach, William Goran, and Anthony Latino	
5. <i>Military operations in the hot desert environment</i>	39
Daniel A. Gilewitch	
6. <i>Dust storms and the 1980 Iran hostage rescue attempt</i>	49
Joseph P. Henderson	
PART II. GEOSCIENCE FOR MILITARY OPERATIONS	
7. <i>Characterizing the desert environment for Army operations</i>	57
Daniel A. Gilewitch, W. Chris King, Eugene J. Palka, Russell S. Harmon, Eric V. McDonald, and William W. Doe III	
8. <i>Hydrogeology of Afghanistan and its impact on military operations</i>	69
Christopher A. Gellasch	
9. <i>Recommendations for the development of a dust-suppressant test operations procedure (TOP) for U.S. Army materiel testing</i>	83
Steven N. Bacon, Eric V. McDonald, Graham K. Dalldorf, Wayne Lucas, and George Nikolich	
PART III. MILITARY ENVIRONMENTAL STEWARDSHIP	
10. <i>U.S. military installations as bioreserves: A case study from Fort Hood, Texas</i>	101
Timothy J. Hayden	
11. <i>Overview of Department of Defense land use in the desert southwest, including major natural resource management challenges</i>	109
William W. Doe III, Timothy J. Hayden, Robert M. Lacey, and William D. Goran	

- 12. Remote sensing for soil map unit boundary detection** 119
Emily E. Frisbee, J.B.J. Harrison, J.M.H. Hendrickx, and B. Borchers
- 13. Simulating the impacts of small convective storms and channel transmission losses on gully evolution** 131
Xiangjiang Huang and Jeffrey D. Niemann
- 14. Dryland channel networks: Resiliency, thresholds, and management metrics** 147
Ellen Wohl
- 15. Quaternary geologic studies on playas of the Nevada Test and Training Range in support of the Nellis AFB training mission** 159
Robert Dickerson and Nicholas Malczyk
- 16. Role of biological soil crusts in desert hydrology and geomorphology: Implications for military training operations** 177
Steven D. Warren
- 17. Environmental metrics for assessing optimal littoral penetration points and beach staging locations: Amphibious training grounds, Onslow Beach, North Carolina, USA** 187
Heidi M. Wadman, Jesse E. McNinch, and Amy Foxgrover
- 18. Experiencing nature in militarized landscapes: If a bomb drops in the desert, do we still call it wilderness?** 205
Mary Cablk
