Abstract	1
Introduction	2
Chesapeake Bay Impact Structure—History of Investigations	3
Early Investigations	3
Discovery Phase	5
Investigations in 1996–2004	6
Second Core-Drilling Program and York-James Seismic Survey	7
International Continental Scientific Drilling Program and USGS Drilling and Geophysical Studies in the Central Crater	7
History of Groundwater Studies	8
Brim of the Chesapeake Bay Impact Structure	8
Structural Morphology of the Chesapeake Bay Impact Structure	8
Data Sets	8
Pre-Impact Target Materials	9
Sediments Modified and (or) Redeposited by the Impact	10
Early Postimpact Sediments	11
Methods and Terminology	11
Methods	11
Terminology	12
Core Data	12
Watkins School Core	12
Langley Core	17

Bayside Cores 1 and 2	29
Discussion: Impact Stages and Processes in the Brim	40
Lateral Correlations and Impact Processes	40
Contact and Compression Stage	40
Excavation Stage	46
Modification Stage	46
Early Postimpact Sedimentation	53
Discussion: Comparison to Selected Marine-Target Impact Structures	53
Overview	53
Montagnais	54
Mjølnir	56
Summary and Conclusions	57
Acknowledgments	58
APPENDIX A: Dinoflagellate Species in the Bayside Cores	59
APPENDIX B: Biostratigraphic and Paleoenvironmental Interpretation of Fossil Pollen Samples from Gravel and Sand Unit (Unit GS) and Parautochthonous Potomac Formation (Unit PPF) in the USGS Bayside #2 Core	60
