Abstract	1
Introduction	2
Geological Setting	4
Methods	4
Mapping	4
Cross-Section Construction and Restoration	5
U-Pb Geochronology	5
Thermochronology	6
Nd-Isotope Geochemistry	6
Stratigraphy	6
Approach	6
Lesser Himalayan Sequence	7
<i>Lower Lesser Himalayan Sequence Quartzitic Units: Kushma, Naudanda, and Fagfog Formations</i> . . .	13
<i>Lower Lesser Himalayan Sequence Pelitic Units: Ranimata and Kuncha Formations</i>	16
<i>Lower Lesser Himalayan Sequence: Lesser Himalayan Augen Gneiss (Ulleri Gneiss)</i>	16
<i>Upper Lesser Himalayan Sequence: Galyang Formation</i>	20
<i>Upper Lesser Himalayan Sequence: Syangia Formation</i>	20
<i>Upper Lesser Himalayan Sequence: Lakharpata Group</i>	23
Greater Himalayan Sequence and Protolith	23
Tethyan Himalayan Sequence	30
Gondwana Sequence	31
Cenozoic Foreland Basin Sequence	34
Neogene Extensional Basins in the Greater and Tibetan Himalayas	35

Structural Geology	35
General Approach	35
Regional Structures in Indian Basement of the Foreland	35
Frontal Imbricate Belt (Siwalik Belt, Subhimalayan Zone)	35
Main Boundary Thrust and Lesser Himalayan Imbricates	37
Ramgarh Thrust	37
Jajarkot and Dadeldhura Klippen	40
Lesser Himalayan Duplex	42
Main Central Thrust	43
South Tibetan Detachment System	43
Thermochronology	44
Results	44
Interpretation	46
Shortening and Kinematic History	46
Tibetan Himalaya, Main Central Thrust, and South Tibetan Detachment	46
Ramgarh Thrust	50
Lesser Himalayan Duplex	51
Main Boundary Thrust	52
Frontal Imbricate Zone and Main Frontal Thrust	52
Total Shortening	52
Discussion	53
Stratigraphic Continuity in the Nepal Himalaya	53
Location and Definition of the Main Central Thrust	54
Shape of the Major Footwall Ramp	55
Orogenic Wedge Behavior	59
Shortening as the Record of Postcollision Convergence	61
Conclusions	63
Acknowledgments	64
