

CONTENTS

Foreword and acknowledgments	1
INTRODUCTION	
1. Geological and historical perspective	5
2. Tectonic and geophysical overview	31
3. Biostratigraphy and related studies	87
REGIONAL GEOLOGY	
4. Paleozoic geology	141
5. The geology of the southeastern margin of Canada	167
6. The continental margin around Newfoundland	239
7. Geology of the Labrador Shelf, Baffin Bay, and Davis Strait	293
MARGIN EVOLUTION	
8. Aspects of North Atlantic paleo-oceanography	351
9. Geodynamics of rifted continental margins	391
QUATERNARY STUDIES	
10. Quaternary geology	475
11. Modern sedimentary processes	609
RESOURCES	
12. Petroleum resources	677
13. Mineral resources	721
14. Constraints to development	743
POSTSCRIPT	
15. The future: a view of marine geology and geophysics in 1987	825
APPENDIX: The history of exploration of the continental margin of Eastern Canada	833
Index	847
