

Contents

<i>Foreword</i>	v
1. Critical zone evolution: Climate and exhumation in the Colorado Front Range	1
Suzanne P. Anderson, Robert S. Anderson, Gregory E. Tucker, and David P. Dethier	
2. Colorado geology then and now: Following the route of the Colorado Scientific Society's 1901 trip through central Colorado	19
Beth Simmons	
3. Transect of the Sevier and Laramide orogenic belts, northern Utah to Wyoming: Evolution of a complex geodynamic system	83
Adolph Yonkee, Arlo Brandon Weil, and Gautam Mitra	
4. Laramide basin CSI: Comprehensive stratigraphic investigations of Paleogene sediments in the Colorado Headwaters Basin, north-central Colorado	139
Marieke Dechesne, James C. Cole, James H. Trexler Jr., Patricia H. Cashman, and Christopher D. Peterson	
5. Seismogenic fault-zone processes and heterogeneity recorded by pseudotachylite: New insights from the Homestake shear zone, Colorado	165
Joseph L. Allen and Colin A. Shaw	
6. Proterozoic metamorphism and deformation in the northern Colorado Front Range	185
Kevin H. Mahan, Julien M. Allaz, Graham B. Baird, and Nigel M. Kelly	
7. Making the case for the Picuris orogeny: Evidence for a 1500 to 1400 Ma orogenic event in the southwestern United States	205
Christopher G. Daniel, James V. Jones III, Christopher L. Andronicos, and Mary Beth Gray	
8. The Laramie anorthosite complex and its contact metamorphic aureole	237
B. Ronald Frost, Robert L. Bauer, James S. Scoates, and Jeffrey S. Ingram	
9. Processes and rates of headcut migration in eastern Colorado gullies: West Bijou Creek field trip guide	259
Francis Rengers and Gregory E. Tucker	
10. Fossils and geology of the Greenhorn Cyclothem in the Comanche National Grassland, Colorado	269
Steve Miller	

- 11. Paleozoic to Mesozoic sedimentary formations in the Colorado Front Range, Roxborough State Park: Documenting geologic landscapes and features through geo-photography 279**
Ellen Morris Bishop, Steve Weaver, and Marli Bryant Miller
- 12. New views on late Paleozoic climate and tectonics in the Ancestral Rocky Mountains 295**
Gerilyn S. Soreghan and Dustin E. Sweet
- 13. Strata, structures, and enduring enigmas: A 125th Anniversary appraisal of Colorado Springs geology 331**
Christine Siddoway, Paul Myrow, and Elisa Fitz-Díaz
- 14. From ignimbrite to batholith, northeastern San Juan Mountains, Colorado: Bonanza, Cochetopa Park, and North Pass calderas 357**
Peter W. Lipman, William C. McIntosh, and Matthew J. Zimmerer
