<i>Dedication</i>	v
<i>Introduction</i>	vii
T.G. Fisher and E.C. Hansen	
<i>1. A previously unrecognized path of early Holocene base flow and elevated discharge from Lake Minong to Lake Chippewa across eastern Upper Michigan</i>	1
W.L. Loope, H.M. Jol, T.G. Fisher, W.L. Blewett, H.M. Loope, and R.J. Legg	
<i>2. The contemporary elevation of the peak Nipissing phase at outlets of the upper Great Lakes</i> . . .	15
T.A. Thompson, J.W. Johnston, and K. Lepper	
<i>3. Late Holocene coastal development along the southern shore of Lake Michigan determined by strategic dating of stabilized parabolic dunes and wetlands of the Tolleston Beach</i>	31
E.P. Argyilan, K. Lepper, and T.A. Thompson	
<i>4. Late Holocene dune development and shift in dune-building winds along southern Lake Michigan</i>	47
Z. Kilibarda, R. Venturelli, and R. Goble	
<i>5. Dune formation on late Holocene sandy bay barriers along Lake Michigan's Door Peninsula: The importance of increased sediment supply following the Nipissing and Algoma high lake-level phases</i>	65
J.E. Rawling III and P.R. Hanson	
<i>6. Coastal geology and recent origins for Sand Point, Lake Superior</i>	85
T.G. Fisher, D.E. Krantz, M.R. Castaneda, W.L. Loope, H.M. Jol, R. Goble, M.C. Higley, S. DeWald, and P.R. Hanson	
<i>7. Sand in lakes and bogs in Allegan County, Michigan, as a proxy for eolian sand transport</i> . . .	111
S. DeVries-Zimmerman, T.G. Fisher, E.C. Hansen, S. Dean, and S. Björck	
<i>8. Elucidating paleo dune activity and timing from wetlands in the lee of coastal sand dunes, Grand Mere Lakes, Michigan, USA</i>	133
B.E. Hanes, T.G. Fisher, R.H. Becker, and J.M. Martin-Hayden	
<i>9. Temporally constrained eolian sand signals and their relationship to climate, Oxbow Lake, Saugatuck, Michigan</i>	151
K. Baca, T.G. Fisher, and J.F. Gottgens	

- 10. The role of extratropical cyclones in shaping dunes along southern and southeastern Lake Michigan** 167
B. Yurk, E.C. Hansen, S. DeVries-Zimmerman, Z. Kilibarda, D. van Dijk, B. Bodenbender, A. Krehel, and T. Pennings
- 11. Short- and long-term perspectives on the evolution of a Lake Michigan foredune** 195
D. van Dijk
- 12. Using remote sensing and geospatial analysis to understand changes to Lake Michigan dunes** 217
A. Belford, S.D. Kenbeek, J. VanHorn, and D. van Dijk
