*Introduction* ..... v  
Joshua M. Feinberg, Yongli Gao, and E. Calvin Alexander Jr.

## HISTORICAL PERSPECTIVES ON CAVES AND KARST RESEARCH

1. *The science of caves and karst: From the beginning of the Geological Society of America to ca. 1960* ..... 1  
Derek Ford

2. *Science of caves and karst: A half century of progress* ..... 19  
William B. White

3. *Karst mapping in the United States: Past, present, and future* ..... 35  
David J. Weary and D.H. Doctor

4. *Historical review and forward view of cave and karst research in Texas* ..... 49  
George Veni and Nico Hauwert

## FORMATIONAL PROCESSES IN CAVE AND KARST ENVIRONMENTS

5. *Morphometric analysis of cave patterns using fractal indices* ..... 67  
Patricia N. Kambesis, Erik B. Larson, and John E. Mylroie

6. *Geologic history of the Black Hills caves, South Dakota* ..... 87  
Arthur N. Palmer, Margaret V. Palmer, and James B. Paces

7. *Depth and timing of calcite spar and “spar cave” genesis: Implications for landscape evolution studies* ..... 103  
David D. Decker, Victor J. Polyak, and Yemane Asmerom

## THE HYDROGEOLOGY OF KARST AND EPIKARST

8. *The importance of advection for CO<sub>2</sub> dynamics in the karst critical zone: An approach from dimensional analysis* ..... 113  
Matthew D. Covington

9. *Initial pipe development within epikarst microfractures* ..... 129  
Maria Inés Dragila, Katrina M. Hay, and Stephen W. Wheatcraft

10. *On the efficacy of monitoring wells in karstic carbonate aquifers* ..... 137  
Ralph O. Ewers

<b>11. Assessing structural control on groundwater flow in the Morrell Cave springshed, Sullivan County, Tennessee</b> . . . . .	151
Taylor Burnham, Ingrid Luffman, Michael Whitelaw, and Yongli Gao	
<b>12. Geochemistry of cave pools connected to an alpine epikarst—Timpanogos Cave National Monument, Utah</b> . . . . .	165
Lee J. Florea, Chelsie R. Dugan, and Camille McKinney	
<b>13. Analysis of hydrologic and geochemical time-series data at James Cave, Virginia: Implications for epikarst influence on recharge in Appalachian karst aquifers</b> . . . . .	181
Sarah Eagle, William Orndorff, Benjamin Schwartz, Daniel H. Doctor, Jonathan Gerst, and Madeline Schreiber	
<b>BIOLOGICAL AND ARCHAEOLOGICAL INTERACTIONS WITH CAVES AND KARST</b>	
<b>14. Caves, hills, and caches: The importance of karst landscapes for the Prehispanic and contemporary Maya</b> . . . . .	197
Brent K.S. Woodfill, Jon Spenard, and Megan Parker	
<b>15. Microclimate and niche constructionism in tropical bat caves: A case study from Mount Elgon, Kenya</b> . . . . .	211
Joyce Lundberg and Donald A. McFarlane	
<b>CLIMATE AND SEDIMENTARY RECORDS PRESERVED WITHIN CAVES AND KARST</b>	
<b>16. High-resolution rainfall records for middle and late Holocene based on speleothem annual UV fluorescent layers integrated with stable isotopes and U/Th dating, Raccoon Mountain Cave, Tennessee, USA</b> . . . . .	231
Steven G. Driese, Zheng-Hua Li, Hai Cheng, Jane L. Harvill, and Justin Sims	
<b>17. Middle Pleistocene glacial outwash in poljes of the Dinaric karst</b> . . . . .	247
K.R. Adamson, J.C. Woodward, and P.D. Hughes	
<b>18. Long-distance sediment transport and episodic resedimentation of Pennsylvanian dust (eolian silt) in cave passages of the Mississippian Leadville Limestone, southwestern Colorado, USA</b> . . . . .	263
James E. Evans and Michael Soreghan	
<b>19. Paleomagnetic constraints on the Atapuerca karst development (N Spain)</b> . . . . .	285
J.M. Parés, A.I. Ortega, A. Benito-Calvo, A. Aranburu, J.L. Arsuaga, J.M. Bermúdez de Castro, and E. Carbonell
